

Introduction

This report summarizes the Cross-Systems Sequential Intercept Mapping (SIM) workshop held in Tavares, Lake County, FL. on March 31, 2016. The workshop was facilitated by the Criminal Justice, Mental Health, and Substance Abuse (CJMHS) Technical Assistance Center at the Florida Mental Health Institute (FMHI), University of South Florida (USF). This report includes:

- A brief review and background for the workshop
- Information gathered at the workshop based on the Sequential Intercept Model or Cross-Systems Mapping
- An action planning matrix with priorities that was developed by the cross-systems participants
- Summary and observations by the CJMHS Technical Assistance Center to assist Lake County achieve its goals
- A cross-systems intercept map based on the perceptions of the Lake County mapping participants.

Background

The Lake County Government (Department of Community Safety and Compliance, Probation

The participants in the workshop included 21 individuals representing multiple stakeholder systems, including leadership from Lake County Government, substance abuse and mental health (SAMH) treatment, corrections, law enforcement, advocates, consumers, state attorney and public defender , and the courts. A complete list of participants is available at the end of this document. Mark Engelhardt, M.S., MSW, ACSW, Jim Winarski, MSW, and Melissa Barongi, B.S. from USF-FMHI facilitated the workshop session.

Law enforcement and the courts are knowledgeable about relevant issues and appear willing to participate in cross-systems initiatives

Collaborative relationships across systems, including the public defender and state

Lifestream Behavioral Center is a comprehensive SAMH provider with an array of acute and continuing care for persons with serious mental illness and substance use disorders

While the county population has grown significantly in recent years, participants in the mapping exercise identified a number of areas where intervention with a comparatively small group of individuals could have a positive impact

Lake County Cross-

In the absence of a well defined jail diversion system, officers lean towards respond to the same call within 24 hours.

The waitlist, as reported for psychiatric services on average-is 6 weeks, but there is no waiting list for substance abuse issues

Mental Health First Aid Training is needed in the larger community, including churches and social service programs

The Marchman Act is not used as a diversionary tool

EMS or other transportation options could be used by the County

Commission as an alternative to having all Baker Act Transportation provided by law enforcement

Intercept II: Initial Detention / Initial Detention and Court Appearance

Identified Strengths and Resources

The jail population has decreased from 1300 to 750 since 2008 and remained between 750-800 in the last three years.

Case management is offered when someone needs a mental health evaluation

LifeStream provides transportation and treatment for clients that are on probation.

Inmates that are screened for

Identified Gaps - Community Corrections / Community Support (Intercept 5)

Specialized staffing needed for intervention for persons who violate probation (VOP)

Support and diversion is needed when offenses are minor. Lack of evidenced-based SAMH re-entry programs

Need for supportive housing and sober halfway houses

Need for employment programs

Peer-run services

Expand Wellness Recovery Action Planning (WRAP)

Access to outpatient treatment for persons with insurance, Medicaid or Medicare (older adults)

Expand benefits training, such as dedicated staff who are SOAR Trained (Social Security/SSDI, Outreach, Access and Recovery)

The Lake

Lake Count
